

Assessments: Assigning Points to Questions

For quizzes and self tests, you can assign points to questions. By default, questions are assigned 10 points each. However, you can customize the number of points that each question is worth.

To assign points to questions:

1. From the Assessment screen, select the linked assessment title. The assessment appears.
2. Under Points, enter values for questions as needed.
3. Click **Update Total**. The screen updates and the total number of points for the quiz is updated.

A screenshot of a Blackboard assessment interface. At the top, it says "Final Exam" with a dropdown arrow and "(Hidden)". Below that is a "Description" link. There are three buttons: "Add to Assessment", "Add a Part", and "Create Questions". A table follows with columns "Move", "Title", "Points", and "Type". The table contains two rows of questions and a "Total Points" row. The "Total Points" row shows a value of 50 and an "Update Total" button. At the bottom, there are "Add Question Alternates" and "Remove" buttons.

Move	Title	Points	Type
<input type="checkbox"/>	4. <u>Romeo and Juliet - The Balcony Scene</u>	5	Fill in the Blank
<input type="checkbox"/>	5. <u>Shakespeare's Comedies</u>	5	Combination
Total Points:		50	<input type="button" value="Update Total"/>
