

## Assessments: Fill in the Blank Questions

Students are presented with a question containing blank spaces and must provide the missing text. One or more correct answers can be specified for each blank.

**Romeo and Juliet - The Balcony Scene**  
Complete the following passage from Romeo and Juliet: What's in a [name] ? That which we call a [rose] would still smell as [sweet]; So [Romeo] would, were he not Romeo call'd, Retain that dear perfection...

### To create the question and answer for a fill in the blank question:

1. Enclose words that you want to appear as blanks in square brackets.

Create Fill in the Blank Question

\*Title:   
Enclose text that is to appear as a blank within square brackets. Example: Fill in the [blank].

Question text:

Use HTML    Insert equation:

Image Title:

**Enclose words that you want to appear as blanks in square brackets.**

2. Click **Generate Answers** to display the *Answers* area.

- Determine the value for each blank and the grading scheme for each answer. For example, you can choose whether the students' responses must be exactly the same as your answer ("equals") or if their responses can just include the answer text ("contains"). You may also enable students to enter alternate answers and specify a partial value for them.

**Answers**  
 Questions appearing in a quiz must be assigned an answer, value (%) and grading scheme

Answer text	Value (%)	Grading scheme	Actions
Answer 1: name	25	Equals	Create Alternate
Alternate 1a: title	10	Contains Equals Regular expression	
Answer 2	25	Equals	Create A

**Values must total 100%**

**Alternate answers can be given full or partial credit**
